A MESSAGE FROM
OUR NEW EXECUTIVE DIRECTOR

Introducing the newest member to our team: Lehua Andrade. She humbly returns to Hui Mālama Ola Nā ʻŌiwi as the organization’s Executive Director. Let’s join together in welcoming her back on board and reading her special Executive Director message below:

Aloha mai kākou!
As the new Executive Director, I understand the responsibility and recognize the work involved in moving Hui Mālama Ola Nā ʻŌiwi forward. Our mission in uplifting the health of the people of Hawaiʻi and of our Hawaiian Nation is foremost. We will continue to be of service and provide for the needs of our Hawaiʻi Island community.

This is an interesting time we live in and it provides us with a great opportunity to innovate and transform how we do business. As the Native Hawaiian Health Care System for Hawaiʻi Island, we will work together with other health systems, community organizations and business leaders to care for the Hawaiʻi Island community. We are resilient and collectively, Hawaiʻi will HOLOMUA!

Please be safe, take care of yourself, and aloha kekahi i kekahi. Me ka ʻoiaʻiʻo,

Lehua Andrade

HMONO.ORG

Aloha mai kākou!

I am Aunty Edna and today I want to talk with you about your heart. February is Heart Health Month. This is a good time to think about how to mālama, or care for, your organ of love - the heart.

Fold your hand into a fist and place it over the center of your left breast area. Compare the area to the size of your whole body. That little area is the size of your heart, and the only part of your body that never rests and works every minute of your life from the moment you are born.

The heart fills a very special role. It pumps blood around your body. The blood provides your body with oxygen and nutrients it needs. It also carries away waste.

Knowing how important your heart is, this month we should pay extra close attention to what we need to do or change so that our small, but mighty heart can continue to do its big job of keeping you alive, healthy, and well throughout the year.

Some key tips include exercising, eating plenty of fruits and vegetables, limiting soda or other sugary drinks, and not smoking. High blood pressure, high blood cholesterol, and high blood sugar can negatively impact your heart health so make sure to do your doctor recommended health screenings!

Need help or want to talk story? Connect with us at Hui Mālama Ola Nā ʻŌiwi, working 29 years to help our Hawaiʻi island be a healthy and happy place. Visit our website at hmomo.org.

Hele mai, connect with us... and tell them Aunty Edna sent you!

A glimpse of what Hui Mālama Ola Nā ʻŌiwi is doing to help our Hawai‘i island ‘ohana Live Longer and Feel Better, Together!

Coming Together to Mālama Survivors
Donna Dennerlein, our Licensed Social Worker, and Chauncey Hatico, our Community Health Worker Supervisor, attended the North Hawai‘i Domestic Violence meeting on January 9 to learn more about connecting with and caring for our community members surviving domestic violence.

Creative Outreach at Waimea Midweek Market
In her first independent outreach since recently becoming part of the Hui Mālama ‘ohana, Adele Dela Rosa, who is now our Community Health Worker of North Hawai‘i, reached out to Waimea Midweek Market to connect with community members, offer our services, and register clients.

Cancer Support Group Celebrates 10 Years of Aloha
Mālama Ka Pili Pa’a, the Cancer Support Group of Hui Mālama, celebrated their 10th anniversary as a group on January 11. The group has been providing support, aloha, and guidance to those affected by cancer since 2011. The group celebrated with a drive-thru featuring live music, food, photos, and a memory board honoring their ‘ohana who have passed on.
Are you or someone you love fighting cancer? Come talk story with us by signing up at hmono.org/services.
Heart failure - One of the most common complications of heart disease. Heart failure occurs when your heart can't pump enough blood to meet your body's needs.

Heart attack - A blood clot blocking the blood flow through a blood vessel that feeds the heart.

Stroke - When the arteries to your brain are narrowed or blocked so that too little blood reaches your brain.

Aneurysm - A serious complication that can occur anywhere in your body. An aneurysm is a bulge in the wall of your artery.

Peripheral artery disease - When extremities (usually your legs) don't receive enough blood flow.

Sudden cardiac arrest - The sudden, unexpected loss of heart function, breathing, and consciousness.

Heart (or cardiovascular) disease can refer to a number of conditions, many of which are related to something called atherosclerosis. Atherosclerosis is when plaque builds up in the walls of arteries. Reducing our risk of heart disease can reduce our risk of the conditions related to it, including:

Heart failure - One of the most common complications of heart disease. Heart failure occurs when your heart can't pump enough blood to meet your body's needs.

Heart attack - A blood clot blocking the blood flow through a blood vessel that feeds the heart.

Stroke - When the arteries to your brain are narrowed or blocked so that too little blood reaches your brain.

Aneurysm - A serious complication that can occur anywhere in your body. An aneurysm is a bulge in the wall of your artery.

Peripheral artery disease - When extremities (usually your legs) don't receive enough blood flow.

Sudden cardiac arrest - The sudden, unexpected loss of heart function, breathing, and consciousness.

What is Heart Disease?

Heart (or cardiovascular) disease can refer to a number of conditions, many of which are related to something called atherosclerosis. Atherosclerosis is when plaque builds up in the walls of arteries. Reducing our risk of heart disease can reduce our risk of the conditions related to it, including:

- Heart failure - One of the most common complications of heart disease. Heart failure occurs when your heart can't pump enough blood to meet your body's needs.
- Heart attack - A blood clot blocking the blood flow through a blood vessel that feeds the heart.
- Stroke - When the arteries to your brain are narrowed or blocked so that too little blood reaches your brain.
- Aneurysm - A serious complication that can occur anywhere in your body. An aneurysm is a bulge in the wall of your artery.
- Peripheral artery disease - When extremities (usually your legs) don't receive enough blood flow.
- Sudden cardiac arrest - The sudden, unexpected loss of heart function, breathing, and consciousness.

Know Your Risk

Certain health conditions increase the risk of heart disease, such as these:

- High blood pressure - also known as Hypertension. Check the table above to learn what your numbers might mean.
- Unhealthy blood cholesterol levels
- Diabetes mellitus
- Obesity

Reducing Your Risk

There are important lifestyle changes you can take to be heart smart this year, but it's important to ask your health care team about these changes:

- Keep a healthy weight
- Reduce sodium (salt); read food labels
- Eat plenty of fresh veggies and fruits and limit saturated fats
- Limit alcohol (no more than 2 drinks/day for men, 1 drink/day for women)
- Get regular physical activity (at least 30 minutes/day on most days)
- Manage other health conditions (e.g., diabetes)
- Take medicine as directed

Not sure where to start? Need some guidance? Join our free Hypertension Management classes.

What a Healthy Heart Means To Us

"Heart Health to me is being in touch with your emotional, spiritual and physical health. It's loving yourself, your health, your mind, body and soul. Heart Health is giving yourself space and grace to rest, breathe, drink water, eat nutritious meals, journal, take a walk, do yoga, playing music, dance etc. Remember to celebrate the little things in life. Take time to pour into yourself. It's so easy to empathize with others but can sometimes be a challenge empathizing with ourselves. Let's take on 2021 manifesting healthy habits."

-Kathy Gikbay, Health Resources Specialist - Fitness

"Heart health means to have a strong, healthy heart that will support us throughout our lives with the quality of life we all deserve. Prevention is the key factor. Minimize stressors in your life, monitor your diet and exercise accordingly to keep your heart working at its best and don't forget to take time out for resting. Your heart works twenty four seven, so don't forget to give it time to rest as well."

-Bernie Freitas, Director of Programs, Traditional Hawaiian Healing

Upcoming Hypertension Classes

February 4, 11, and 18 | 5:00pm - 7:00pm
April 7, 14, and 21 | 5:00pm - 7:00pm
Sign up at hmono.org/services or call us at (808) 969-9220 for more information!

"Heart health is the maintenance or promotion of a healthy heart. To maintain or promote a healthy heart it is crucial to have a healthy lifestyle. Things like not smoking, eating a healthy diet, getting regular exercise, maintaining a healthy weight, and practicing stress management skills (reading, gardening, walking, socializing, and meditation) are some ways to live a healthy lifestyle and to have a HAPPY heart."

-Chauncey Hatico, Community Health Worker

Aloha mai kākou,

I am Aunty Edna and today I want to talk with you about your heart. February is Heart Health Month. This is a good time to think about how to mālama, or care for, your organ of love - the heart.

Fold your hand into a fist and place it over the center of your left breast area. Compare the area to the size of your whole body. That little area is the size of your heart, and the only part of your body that never rests and works every minute of your life from the moment you are born.

The heart fills a very special role. It pumps blood around your body. The blood provides your body with oxygen and nutrients it needs. It also carries away waste.

Knowing how important your heart is, this month we should pay extra close attention to what we need to do or change so that our small, but mighty heart can continue to do its big job of keeping you alive, healthy, and well throughout the year.

Some key tips include exercising, eating plenty of fruits and vegetables, limiting soda or other sugary drinks, and not smoking. High blood pressure, high blood cholesterol, and high blood sugar can negatively impact your heart health so make sure to do your doctor recommended health screenings!

Need help or want to talk story? Connect with us at Hui Mālama Ola Nā ʻŌiwi, working 29 years to help our Hawai‘i island be a healthy and happy place. Visit our website at hmono.org.

Hele mai, connect with us... and tell them Aunty Edna sent you!

IMMUNIZATION PROGRAM

As part of the Hui Mālama Ola Nā ʻŌiwi Immunization Program, your child can receive a FREE backpack or sleeping bag if they meet the two criteria below:

1. Your child turns 2 years old between August 2020 and July 2021.
2. Your child has completed all 24-25 CDC recommended vaccinations (below).

Contact us at contact@hmono.org to submit your child’s immunization card, register your child, and receive their makana!

Those in Phase 1-a and Phase 1-b can schedule appointments at any of the locations below.

Department of Health
Phone: (808) 300-1120
Hours: Mon-Fri, 9:00 am-3:00 pm (except for holidays)

Hilo Medical Center (HMC)
Register at HiloMedicalCenter.org
You will need your own email address. For computer assistance, call 808-932-3000 and press 8 for help.

Queen’s North Hawai’i Community Hospital (QNHCH)
Phone: (808) 881-4668
Email: QNHCHVaccine@queens.org

For more information about our immunization program, visit our website at hmono.org/immunization-program.

COVID-19: VACCINATION UPDATES

The number of COVID-19 vaccination doses in the initial phases is limited, but supplies will increase over time. Check out the timeline below to see where you fit:

1. Your child turns 2 years old between August 2020 and July 2021.
2. Your child has completed all 24-25 CDC recommended vaccinations (below).

For more information, visit hawaiicovid19.com/vaccine.

Ongoing Services
